---

Rebecca,

I spoke with Amy Christiansen (ESAT) late yesterday regarding the archived wood chip samples. Amy indicated that all 74 samples identified will be pulled and sent to the onsite lab (EMSL) by no later than 5/20/11. She hopes to have them out sooner if possible. EMSL will then take a quick look at the samples and recommend appropriate analytical methods. This evaluation should only take a day or so.

I will provide you with an update as the samples are sent to the lab.

Thank you,

*Nick Raines*
